

PRODUCT DATA SHEET

RUBBERALL® Termination Bar

Water Tight Technologies, LLC
2500 Dewitt Street
Ekhart, IN 46517
www.watertighttech.com

DESCRIPTION:

RUBBERALL® Termination Bar is intended for attaching and sealing flashing terminations as outlined in the Rubberall® Installation Manual. Termination bars are packaged in cardboard tubes with end caps and are shipped 50 bars per tube.

APPLICATION:

Substrates must be free from dust, dirt, oil, water and other contaminants. Wall areas above Termination Bar must be waterproof. Apply RUBBERALL® Water Cut-Off Mastic between the substrate and flashing directly under where the Termination Bar is to be installed. Anchor bar through each pre-punched hole. Apply a small bead of Lap Caulk on the top lip of Termination Bar.
